

**Champaign [name of muni ag tax area(s)]
Residential Account and Service Point-Specific Information**

Date Report Produced: [mm.dd.yyyy]

Please note the following:

1. Data contained in this worksheet is accurate as of the time that the worksheet was created.
2. Data for all currently-active residential service points is reflected in the results shown on this worksheet.
3. In Rate Zone I-ME and Rate Zone II, discounted non-summer month block rates apply to all DS1 (residential) service points that are on BGS-ME or BGS supply. Because of this (and since there is no space heat rate designation in these two Rate Zones), the RES or Government Aggregator is strongly encouraged to evaluate such service points for high non-summer usage before indicating to the customer that he/she will save money by switching to a municipal aggregation program. To aid in this evaluation, the "Second Tier Use" column will indicate a "Y" for any service point that has electric usage in excess of 800 kWh in four of the eight non-summer months. Note that in Rate Zone I and Rate Zone III, where there is a space heat rate designation, the Second Tier Use column is only meaningful for service points that are on a space heat rate.
4. A billing address is only listed if it is different from the premise address.

| Rate Zone | Bill Group | Account Name | Premise Address Field 1 | Premise Address Field 2 | Premise Address Field 3 | Premise Address City | Premise Address Zip Code | Billing Address Field 1 | Billing Address Field 2 | Billing Address Field 3 | Billing Address City | Billing Address State | Billing Address Zip Code | Service Point Number | DS Classification | Supply Type | Pending Supply Type | Space Heat Rate? | BGS Hold? | RTP PSP Hold? | Rider NM? | Rider QF? | Second Tier Use? | Summer Usage | Non-Summer Usage | Total Usage |
