## Introduction

The Missouri Renewable Energy Standard (RES) began as a public initiative and was placed on the Missouri ballot during the November 4, 2008 election. Labeled as Proposition C, its effect on Ameren Missouri was a requirement to acquire renewable energy resources as a percentage of total retail sales.

As part of the statute and rule making, Section (8) (B) requires that the IOUs file a plan that covers their intended compliance measures for the current year plus the following 2 years.

Compliance with RES requirements includes the REC's from all forms of qualified renewable generation resources (wind, hydro, biomass, solar etc.) as certified by the Missouri Department of Natural Resources (MoDNR). In 2013, the group within DNR responsible for providing renewable certification was transferred from the DNR to the Missouri Department of Economic Development. There is a component of the RES that designates a percentage of REC's must be from a designated solar resources or (S-RECs).

There are also two methods by which compliance is deemed to have been achieved. The first is based on providing enough RECs to meet the requirement, the other is related to the 1% rate cap calculation. Based on that calculation, a utility will be in compliance with the RES once the cost of compliance is equal to or greater than the 1% calculation. Thus a utility could fall short of meeting the RECs requirement but if the 1% calculation is met then the utility is in full compliance.

The following table details the renewables percentage requirements of the retail electric sales for the non-solar and solar RES:

<u>Time Period</u>	<u>Total Renewable Requirement</u>	<u>Solar*</u>
2011-2013	2%	2%
2014-2017	5%	2%
2018-2020	10%	2%
2021-forward	15%	2%

\*Solar percentages are applied to the Total Renewable Requirement RES amounts

As referenced above, the MoDED is responsible for certifying all eligible renewable resources that can be utilized in meeting the requirements of the RES. Department of Natural Resources rule 10 CSR 140-8.010 (2), contains the list of all eligible renewable resources allowed to meet the compliance with the RES.

Ameren Missouri's compliance with the RES, as demonstrated in this report, adheres to the use of only those renewable resources as currently defined by the above referenced rule.

In addition, the RES rules allow for the banking of RECs for up to a three year time period. This will allow for the use of eligible RECs generated from January 1, 2016 to the end of 2019 in meeting the RES requirements for calendar year 2019. Any generation

and/or RECs from a Missouri renewable resource are entitled to a factor of 1.25 applied to each MWh or REC.

The following information in this report will demonstrate the specific means by which Ameren Missouri met its obligations under both the non-solar and solar RES for 2019.

## **RES Compliance**

### **Section (8) (A) 1 A**

#### **Total Retail Electric Sales**

Ameren Missouri reports its total retail electric sales annually to the Federal Energy Regulatory Commission (FERC) in a report called the FERC Form 1. For the reporting year ended December 31, 2019, Ameren Missouri's total retail electric sales were 32,119,373 MWh.

### **Section (8) (A) 1 B**

#### **Total Jurisdictional Revenue**

Total sales to ultimate consumers as reported on the FERC Form 1 for the CY 2019 and associated with the above referenced MWhs were \$3,090,668,836.

### **Section (8) (A) 1 C**

#### **Total Retail Electric Sales Supplied by Renewable Resources**

Ameren Missouri is the owner and operator of the Keokuk Hydro-electric Generation Station located on the Mississippi River in Keokuk, Iowa. The station consists of 15 separate generators. The individual nameplate ratings range from 7.2 to 8.8 MWs.

The Keokuk Hydro-electric Generation Station was certified as a qualified renewable energy resource by the MoDNR on September 28, 2011. The total generational output from the Keokuk facility for the CY 2019 was 782,420 MWhs.

In June, 2009 Ameren Missouri and Pioneer Prairie Wind Farm I LLC entered into a 15 year power purchase agreement. Ameren Missouri is purchasing 102.3 MWs of nameplate generation from the Pioneer Prairie Wind Farm consisting of 62 turbines, located in north east Iowa. The facility site covers approximately 10,000 acres of land located in Mitchell County, Iowa in Wayne and Stacyville Townships.

The Pioneer Prairie Wind Farm was certified as a qualified renewable energy resource by the MoDNR on September 28, 2011. The total generational output from the Pioneer Prairie Wind Farm supplied to Ameren Missouri customers for the CY 2019 was  
\*\* \_\_\_\_\_ \*\* MWhs.

In December, 2010 Ameren Missouri completed construction of approximately 100 kW of various PV solar technologies at its headquarters office building.

The Ameren Missouri headquarters solar installation was certified as a qualified renewable generation facility by the MoDNR on September 28, 2011. The total

generational output of this facility during CY 2019 was 82 MWhs. In accordance with RSMo 393.1030, and as this facility is located in the state of Missouri, a factor of 1.25 is applied to the generation from this facility such that the generation counts as 102 MWhs towards the compliance requirements.

On June 16, 2012, the Maryland Heights Renewable Energy Center (MHREC) became commercially operational. This facility burns methane gas produced by the IESI Landfill in Maryland Heights, MO in 3 Solar 4.9 MW Mercury 50 gas turbines to produce electricity.

On August 27, 2012, the MHREC was certified as a qualified renewable energy resource by the MoDNR. The generational output from the MHREC for CY 2019 was 52,483 MWhs. In accordance with RSMo 393.1030, and as this facility is located in the state of Missouri, a factor of 1.25 is applied to the generation from this facility such that the generation counts as 65,304 MWhs towards the compliance requirements.

On November 14, 2014, Ameren's first utility scale solar facility became commercially operational. The O'Fallon Renewable Energy Center (O'Fallon Renewable Energy Center) is a 5.7 MW (DC) PV facility located in O'Fallon, MO.

On April 3, 2015, MoDED certified O'Fallon Renewable Energy Center as a renewable resource. The total generational output of this facility during CY 2019 was 6,151 MWhs. In accordance with RSMo 393.1030, and as this facility is located in the state of Missouri, a factor of 1.25 is applied to the generation from this facility such that the generation counts as 7,689 MWhs towards the compliance requirements.

## **Section (8) (A) 1 D**

### **RECs Created by Utility Owned Renewable Resources**

The total RECs created from the Keokuk facility for the CY 2019 was 782,420. The RECs generated from the Keokuk facility are on Ameren Missouri's books at zero cost and value. There are two reasons for this. First, due to the restrictive nature of utilizing hydroelectric to meet Renewable Portfolio Standards (RPS) in other states, there is a very limited market in which the associated Keokuk RECs could be utilized outside of Missouri. Second, the RECs created by this generation are an added benefit to Ameren Missouri rate payers as the capital and operational costs associated with Keokuk are already a part of the existing rate structure. Since the company has not incurred any additional costs above or beyond in order to acquire these RECs, the benefit to the rate payers is in the ability of Ameren Missouri to utilize these RECs to meet compliance and not incur any additional cost in the process.

The total SRECs created from the Ameren Missouri headquarters solar facility during CY 2019 was 82. In accordance with RSMo 393.1030, and as this facility is located in the state of Missouri, a factor of 1.25 is applied to the 102 MWh's of generation from this facility and those SRECs are applied to the compliance requirements.

The total RECs created from the MHREC for CY 2019 was 52,483. In accordance with RSMo 393.1030, and as this facility is located in the state of Missouri, a factor of 1.25 is applied to the generation from this facility such that the RECs count as 65,604 towards the compliance requirements. The value of the 2019 generation is \$1,288,458. Ameren Missouri will use all RECs from this installation to meet current and future MoRES compliance requirements.

The O'Fallon Renewable Energy Center created 6,151 SRECs for CY 2019. In accordance with RSMo 393.1030, and as this facility is located in the state of Missouri, a factor of 1.25 is applied to the generation from this facility such that the RECs count as 7,689 towards the compliance requirements. The value of the energy generated by O'Fallon Renewable Energy Center for CY 2019 was \$151,007. Ameren Missouri will use all SRECs from this solar installation to meet current and future MoRES compliance requirements.

## **Section (8) (A) 1 E**

### **RECs Acquired and Retired**

During CY 2019, Ameren Missouri purchased energy including the associated RECs from the Pioneer Prairie Wind Farm. A total of **\*\* \_\_\_\_\_ \*\*** RECs were acquired in CY 2019 under the terms of the 15 year power purchase agreement.

A total of 52,483 RECs were generated from the Maryland Heights Renewable Energy Center in CY 2019. In accordance with RSMo 393.1030, and as this facility is located in the state of Missouri, a factor of 1.25 is applied to the generation from this facility. Thus, the RECs generated toward compliance requirements are 65,604.

In CY 2019, Ameren Missouri purchased S-RECs generated by Ameren Missouri customers thru the Standard Offer Contract (SOC) that was established in 2011.

Originally, there were two contract types: For systems sized less than 10 kW, Ameren Missouri utilizes a program established by the U.S. DOE called PV Watts to determine the annual generational output from systems installed in the region. Customers who have these size systems are paid a lump-sum up-front payment equal to the generation from their system for a 10 year period. Those RECs are then used over the 10 year period to meet the solar compliance requirement. For systems 10 kW or larger installed prior to January 1, 2013, a five year contract is used but an additional meter is required and customers are paid based on actual production. For systems 10 kW or larger installed after January 1, 2013 and before August 28, 2013, the contract term was extended to 10 years. Due to the implementation of the provisions associated with HB 142, systems greater than 10 kW that are installed after August 28, 2013 no longer require a second meter and their generational output is determined in the same fashion as systems less than 10 kW, utilizing the PV Watts formula.

However, on Aug. 28, 2013, due to the passage of HB 142, the RES law was amended. That amendment provided that if a customer accepts a solar rebate from the utility, the S-RECs transfer to the utility. Due to this change, the SOC program was discontinued and the \$1.0 million SOC cap was not reached.

All S-RECs associated with the customer installed net metered systems, as well as the generation at the Ameren Missouri headquarters facility are entitled to the 1.25 factor as they represent Missouri based generation.

During CY 2019, Ameren Missouri acquired 57,263 solar RECs from its customers under terms of the Standard Offer Contract and the solar rebate for systems that became operational in 2017 and earlier. For more detail regarding systems that became operational in 2018 & 2019, please see Section (8) (A) 1 J. In accordance with RSMo 393.1030, and as these customers are located in the state of Missouri, a factor of 1.25 is applied to the generation such that the RECs count as 71,579.

Additionally, in 2019 the Department of Energy increased the PV watts capacity factor for the St. Louis region from 15.6% to 15.9%. This new percentage will be applied to systems installed on January 1, 2019 or later.

The S-RECs acquired from customers will also be eligible for the 1.25 factor application as stipulated in RSMo 393.1030.

In addition, in 2019 Ameren Missouri purchased 3,063,312 REC's, 3,026,116 non-solar and 37,196 solar from 3<sup>rd</sup> party brokers. These REC's are a combination of 2017, 2018, and 2019 vintages.

The total REC requirement for 2019 = 3,211,938 REC's

Non-solar requirement = 3,211,938 x .98 = 3,147,699 REC's

Solar requirement = 3,211,938 x .02 = 64,239 REC's

The table below illustrates the REC's retired to meet 2019 Non-Solar compliance.

Resource	2017 vintage	2018 vintage	2019 vintage	Total
Keokuk			149,753	149,753
MHREC			56,565	56,565
Pioneer Prairie II		45,146	172,987	218,133
3 <sup>rd</sup> party Non-Solar Purchased REC's	921,974	1,029,397	634,617	2,585,988
3 <sup>rd</sup> party Solar Purchased REC's	18,507	18,689		37,196
Customer Solar	75,231	24,833		100,064
Total				3,147,699

Note: Solar REC's are acceptable and were used to meet the non-solar requirement per the RES.

The table below illustrates the REC's retired to meet 2019 Solar compliance.

Resource	2017 vintage	2018 vintage	2019 vintage	Total
OREC	7,429	7,685	2,243	17,357
Customer Solar		46,882		46,882
Total				64,239

### **Section (8) (A) 1 F**

#### **Source of RECs Acquired**

See Sections (A) 1 D and E above

### **Section (8) (A) 1 G**

#### **RECs Carried Forward**

RECs carried forward through the 3 year banking provision are as follows:

<b><u>Facility</u></b>	<b><u>RECs</u></b>	<b><u>S-RECs</u></b>
Keokuk	632,667	
MHREC	9,039 (1)	
Pioneer Prairie	** <u>          </u> **	
OREC	5,445 (1)	
Ameren Solar Customers		57,263 (1) (2)
3 <sup>rd</sup> Party Non-Solar		
Purchases	440,128	

- 1) These values do not include the in-state factor of 1.25 for those RECs affiliated with in state production and includes the generation from the Ameren Headquarters solar installation.
- 2) These values do not include the REC's received from projects that became operational in 2018 (minimal number) and 2019 (approximately 11,000 RECs) as the certification process for those systems has not been completed. Ameren Missouri will be recording these additional RECs in NARR when that process has been completed.

See Exhibit 1 for details

### **Section (8) (A) 1 H**

#### **Gains or Losses from Purchases or Sales**

Not applicable. There were no sales of RECs and all procurement was either utilized to meet CY 2019 requirements or has been banked in Ameren Missouri's NAR account and will be used for future compliance requirements.

## Section (8) (A) 1 I

### RECs from Non-Utility Owned Resources

#### Non-solar

Facility Name: Pioneer Prairie Wind Farm I  
 Location: Mitchell County, Iowa  
 Wayne and Stacyville Townships  
 Facility Owner: EDP Renewables  
 Resource Type: Wind  
 Turbines: Vestas V82  
 1.65 MW per turbine

See Exhibit 2 for Affidavit

### RECs from 3<sup>rd</sup> Party Purchases

Counterparty	Trade Date	Deal No.	Type	Vintage	Quantity
Southern Co	09/03/2019	24839	Solar	2017	5,238
Southern Co	09/03/2019	24839	Solar	2017	13,269
Southern Co	09/03/2019	24839	Solar	2018	6,973
Southern Co	09/03/2019	24839	Solar	2018	11,716
Southern Co	09/03/2019	24839	Non-Solar	2018	29,397
Southern Co	09/03/2019	24839	Non-Solar	2017	27,880
Southern Co	09/03/2019	24839	Non-Solar	2017	30,782
Southern Co	09/03/2019	24839	Non-Solar	2019	74,745
STX	06/06/2019	3539227	Non-Solar	2017	863,312
STX	06/06/2019	3539247	Non-Solar	2018	1,000,000
STX	06/06/2019	3539248	Non-Solar	2019	450,000
STX	06/06/2019	3539267	Non-Solar	2019	550,000
Total					3,063,312
Total Solar					37,196
Total Non-Solar					3,026,116

See Exhibit 3 for Meter Reads and Payments

## **Section (8) (A) 1 J**

### **RECs from customer generators**

See Exhibit 6 for Customer Generator Resource List

At this time, projects associated with 2019 solar rebate payments have not yet been submitted to or certified by Missouri DNR and so have not been included in the Exhibit 6 table with this report. Upon certification of the projects and validation of the operational dates, it is anticipated that these projects will result in registration of approximately 11,000 SRECs in 2019 and 22,000 SRECs annually thereafter.

Similarly, projects associated with 2018 solar rebate payments that appeared in the previous report do not appear in this Exhibit 6 as those SRECs have not yet been recorded in any NARR account.

## **Section (8) (A) 1 K**

### **Customer Solar Rebates**

During CY 2019, Ameren Missouri processed and paid 700 requests for solar rebates. No rebates are processed until all required meter work has been performed.

## **Section (8) (A) 1 L**

### **Customer Denied Rebates**

There were no rebate denials.

## **Section (8) (A) 1 M**

### **Funds Expended for Solar Rebates**

During CY 2019, Ameren Missouri paid out \$7,840,373.75 associated with solar rebates.

During 2019, there was 1 version- of the Rider SR with the table on the following page providing a summary.

	<b><u>Comment</u></b>
1/1/19 – 12/31/19	The tariff language was relocated to different sheets and identified as Solar Rebate RS MO 393.1030 to distinguish it from the new solar rebate program. It also revised Company's obligation to make new rebate commitments and allows the remainder of the \$91.9 million to be paid to projects that have already been completed.

See Exhibit 4 for Solar Rebate Tariff details

### **S-REC Contract Terms and Conditions**

Beginning in 2013, Ameren Missouri made available a Standard Offer Contract at \$5/MWh to purchase the S-RECs from customers who installed less than 100 kW of solar at their homes and/or businesses and met all net metering requirements as applicable under tariffs filed by Ameren Missouri and approved by the MoPSC.

Originally, there were two contract types: For systems sized less than 10 kW, Ameren Missouri utilizes a program established by the U.S. DOE called PV Watts to determine the annual generational output from systems installed in the region. Customers who have these size systems are paid a lump-sum up-front payment equal to the generation from their system for a 10 year period. Those RECs are then used over the 10 year period to meet the solar compliance requirement. For systems 10 kW or larger installed prior to January 1, 2013, a five year contract is used but an additional meter is required and customers are paid based on actual production. For systems 10 kW or larger installed after January 1, 2013 and before August 28, 2013, the contract term was extended to 10 years. Due to the implementation of the provisions associated with HB 142, systems greater than 10 kW that are installed after August 28, 2013 no longer require a second meter and their generational output is determined in the same fashion as systems less than 10 kW, utilizing the PV Watts formula.

The total dollars spent to purchase customer S-RECs was capped at \$1.0 million for 2013.

However, on Aug. 28, 2013, due to the passage of HB 142, the RES law was amended. That amendment provided that if a customer accepts a solar rebate from the utility, the S-RECs transfer to the utility. Due to this change, the SOC program was discontinued and the \$1.0 million SOC cap was not reached.

See Exhibit 5 for SREC Purchase Tariff

## **Section (8) (A) 1 N**

### **Utility Compliance with RES Plan**

See Exhibit 7 for company Affidavit

**Section (8) (A) 1 O**

Compliance for CY 2019 was achieved.

**Section (8) (A) 1 P**

**Calculation of actual calendar year retail rate impact**

Ameren Missouri's Adjusted Revenue Requirement for CY 2019 is \$3,057,043,376

Total RES Compliance cost for 2019 is \$12,147,976

If we divide the Total RES Compliance cost by the Adjusted Revenue Requirement, we can calculate the retail rate impact

$$= \$12,147,976 / \$3,057,043,376 = 0.40\%$$

## Exhibit 1 Keokuk REC's

UNION ELECTRIC COMPANY ELECTRIC SERVICE

MO.P.S.C. SCHEDULE NO. 6 Original SHEET NO. 88.9

CANCELLING MO.P.S.C. SCHEDULE NO. SHEET NO.

APPLYING TO MISSOURI SERVICE AREA

RIDER SR

SOLAR REBATE RS MO 393.1030

\*PURPOSE

The purpose of this Rider SR is to implement the solar rebate established through §393.1030 RSMo and to establish the terms, conditions and procedures which the Company will rely on in accepting rebate applications and authorizing rebate payments to eligible participants for a qualifying solar electric system.

\*AVAILABILITY

The Company will not suspend payment of solar rebates in 2014 and beyond until the solar rebate payments reach an aggregate level of \$91.9 million (the "specified level") incurred subsequent to July 31, 2012 as defined in the Non-Unanimous Stipulation and Agreement approved by the Missouri Public Service Commission ("Commission") in File Number ET-2014-0085 ("Stipulation"). Solar rebate payments are anticipated to reach the specified level during 2014. The Company has filed with the Commission an application under the 60-day process as outlined in §393.1030.3 RSMo. to cease payments when the specified level is reached and all future calendar years, in accordance with the approved Stipulation, and the Commission has determined that the the maximum average retail rate increase, as specified in §393.1030.3 RSMo., will be reached when the specified level of payments has been made. Ameren Missouri solar rebate funds are no longer available for new applicants. However, if you submitted an application in December 2013 you are in the rebate commitment queue. Details concerning the current payment levels are posted on the Company's website at www.ameren.com.

All retail customers (customer) of Company are eligible for the solar rebate with the following limitations and conditions:

- 1. The customer must be an active account on the Company's system and in good payment standing.
2. The System must be permanently installed on the customer's premise.
3. The customer must declare the installed System will remain in place on the account holder's premise for a minimum of ten (10) years.
4. The solar modules and inverters shall be new equipment and include a manufacturer's warranty of ten (10) years.
5. No retail electric account will be eligible for a solar rebate for more than twenty-five kilowatts (25 kW) of new or expanded capacity irrespective of the number of meters/service points associated with the account.
6. The System or expansion of an existing System must not become operational until after December 31, 2009 and must become operational on or before June 30, 2020.
7. The System shall meet all requirements of 4 CSR 240-20.065 and Company's Electric Power Purchases from Qualified Net Metering Units tariff.

\*AVAILABILITY (Cont'd.)

8. The System must be situated in a location where a minimum of eighty-five percent (85%) of the solar resource is available to the System.

\*DEFINITIONS

Application Requirements - All Net Metering Application and Solar Rebate Application information necessary to receive an approval from Company as defined on Company's website [www.ameren.com](http://www.ameren.com) provided to Company including but not limited to accurate account number, name and service address matching customer billing information, all of the Net Metering Application, all fields of Solar Rebate Application except the "System Installation Date," customer and developer signatures, System plans, specifications, warranties and wiring diagram.

Completion Requirements - All System installation and final documentation requirements as defined on Company's website [www.ameren.com](http://www.ameren.com) provided to Company including but not limited to the System installation date, all required signatures, approval of the local inspection authority having jurisdiction (if applicable), copies of detailed receipts and invoices, System photo(s), taxpayer information form and affidavit (if applicable).

Net Metering Application - Section A. through Section D. of a "Interconnection Application/Agreement for Net Metering Systems with a Capacity of 100 kW or Less" which can be obtained from Company's website [www.ameren.com](http://www.ameren.com).

Operational Date - The date that the Company installs a bi-directional meter and permits parallel operation of the System with Company's electrical distribution system in accordance with Company's "Electric Power Purchases From Qualified Net Metering Units" tariff.

Qualification Date - The date that determines a customer's relative position in the Reservation Queue.

Rebate Commitment - Company's written communication to customer, by letter or email, confirming that solar rebate funding is available for a Solar Rebate Application submitted by customer.

Reservation Queue - The list of all complete Net Metering Applications that have been received by Company which have not expired and have not been paid a Solar Rebate.

Solar Rebate Application - Sections H. and I. of a "Interconnection Application/Agreement for Net Metering Systems with a Capacity of 100 kW or Less" which can be obtained from Company's website [www.ameren.com](http://www.ameren.com).

System - Qualifying solar electric system

## RIDER SR

### SOLAR REBATE RS MD 393.1030 (Cont'd.)

#### \*REBATE RATE SCHEDULE

Subject to the Availability provisions of this Rider SR, complete and accurate Solar Rebate Applications received by Company or postmarked on or before December 31st of any year, and for which the System becomes operational on or before June 30th of the following year, will be eligible for a solar rebate according to the following schedule:

<u>Application Received</u> <u>on or before December</u> <u>31st of the year</u>	<u>Operational Status</u> <u>Achieved on or before</u> <u>June 30th of the year</u>	<u>Rebate Rate per Watt</u>
2013	2014	\$2.00
2014	2015	\$1.50
2015	2016	\$1.00
2016	2017	\$0.50
2017	2018	\$0.50
2018	2019	\$0.50
2019	2020	\$0.25

If a customer has satisfied all of the System Completion Requirements by June 30th, of indicated years, but the Company is not able to complete all of the Company's steps needed to establish an Operational Date on or before June 30th, the Rebate Rate will be determined as though the Operational Date was June 30th. If it is subsequently determined that the customer or the System did not satisfy all Completion Requirements required of the customer on or before June 30th, the rebate rate will be determined based on the Operational Date.

#### \*RESERVATION QUEUE

Company will establish a Reservation Queue for solar rebate payments based on System Qualification Dates. A customer, and their developer, whose Net Metering Application and Solar Rebate Application are approved will be notified in writing, by letter or email that either:

1. Solar rebate funds have been committed for their System, subject to the Qualification Date not changing and the commitment not expiring, or
2. Solar rebate funds cannot be guaranteed for their System

At least twice monthly, Company will notify in writing, by letter or email, those customers and their developers that did not receive a Rebate Commitment but for which a Rebate Commitment is now being made as a result of other Systems that have dropped out of the Reservation Queue. Details concerning the Reservation Queue are posted on the Company website at [www.ameren.com](http://www.ameren.com).

RIDER SR

SOLAR REBATE RS MO 393.1030 (Cont'd.)

\*RESERVATION QUEUE (Cont'd.)

Effective September 28, 2018, Company will only make additional Rebate Commitments under this Rider SR Solar Rebate RS MO 393.1030 tariff to Systems which have already become operational. Customers in the Reservation Queue having approved Net Metering Applications will be notified of the availability of solar rebate funding available through Rider SR Solar Rebate 2018-2023 and advised how and when they can submit an application under that program.

\*QUALIFICATION DATE AND REBATE COMMITMENT

The Qualification Date will be the date Company receives a Net Metering Application and Solar Rebate Application, or the date that is postmarked if delivered by the U.S. Postal Service, that satisfy the Application Requirements and are subsequently approved by Company.

Company will only make a Rebate Commitment to a customer that has a Qualification Date and the customer, and their developer, will be notified in writing, by letter or email, of any deficiencies in the Application Requirements that will prevent a Rebate Commitment by Company.

Company's Rebate Commitment to a customer will expire if:

1. Customer has not returned to Company a completed intent to install form within 30 days of the Rebate Commitment being made. Company will provide the customer with an intent form by U.S. Mail concurrently with the Rebate Commitment. Signing and returning the intent form does not in any way obligate a customer to complete a solar system, or
2. The System has not attained an Operational Date within twelve (12) months of the Rebate Commitment date, or
3. The System is not constructed in accordance with the design submitted by the customer and approved by Company, thereby causing the Net Metering Application to become invalid.

If a customer has satisfied all of the Completion Requirements but the Company is not able to complete all of the Company's steps needed to establish an Operational Date by the expiration of the Rebate Commitment, the Rebate Rate will be determined as though the Operational Date was achieved prior to the expiration. If it is subsequently determined that the customer or the System did not satisfy all Completion Requirements required of the customer on or before the expiration date, the Rebate Commitment will expire and no payment will be made.

## RIDER SR

### SOLAR REBATE RS MD 393.1030 (Cont'd.)

#### \*REBATE PAYMENT

The amount of the rebate will be the combined direct current (DC) rating of the solar module(s) in watts from the manufacturer's specification sheet(s) for the new System or the current expansion of an existing System multiplied by the rebate rate as determined by the Rebate Rate Schedule provisions of this Rider SR.

A rebate payment will be made within thirty (30) days of the Operational Date provided that:

1. A complete and accurate Solar Rebate Application has been accepted by Company and a Rebate Commitment made by Company, and
2. Customer has satisfied all Completion Requirements, and
3. An "Interconnection Application/Agreement for Net Metering Systems with a Capacity of 100 kW or Less" has been executed by the customer and Company.

#### \*SOLAR RENEWABLE ENERGY CREDITS (SREC'S)

On and after August 28, 2013, as a condition of receiving a solar rebate, customer shall transfer to Company all right, title and interest in and to the solar renewable energy credits ("SRECs") associated with the new or expanded System that qualified customer for the solar rebate for a period of ten (10) years from the date Company confirmed that the System was installed and operational.

Rebate payments made by Company prior to August 28, 2013, do not entitle Company to any right, title and interest in the SRECs produced by the portion of the System for which the rebate payment was made.

SRECs produced by the System, for which a rebate is received, cannot be sold or promised for sale to any other party by customer or used by customer for any environmental or "green" program for a period of ten (10) years from the date Company confirmed that the System was installed and operational.

The number of SRECs produced annually will be determined by Company using PVWatts software developed by the U.S. Department of Energy (DOE) with the result rounded to the tenths digit.

### RIDER 5F

#### SOLAR RENEWABLE ENERGY CREDIT PURCHASE

##### PURPOSE

The purpose of this rider is to provide a mechanism for eligible customers to sell and Company to purchase the Renewable Energy Credits associated with energy generated by solar electric systems operating under Company's Electric Power Purchases from Qualified Net Metering Units tariff herein.

##### AVAILABILITY

This rider is available to any retail electric customer operating a solar electric system in compliance with Company's approved net metering tariff.

\*Availability of service under this rider shall be limited to those customers for which an "Interconnection Application/Agreement for Net Metering Systems with a Capacity of 100 kW or Less" is received by Company or postmarked on or before August 27, 2013, and commitments offered by Company on or before December 31, 2013, and by the cumulative total of the actual payment commitments and estimated payment commitments offered by Company during 2013, of up to \$1,000,000 with at least \$350,000 (35%) being reserved specifically for commitments under the Lump Sum Offer as described below.

##### TERM

This rider shall be effective through December 31, 2014, and will terminate thereafter unless modified or extended. In the event that this rider expires, all commitments offered by Company on or before December 31, 2013, will be honored for their full term.

##### DEFINITIONS

1. REC - Renewable Energy Credit, or Renewable Energy Certificate means a tradable certificate, that is either certified by an entity approved as an acceptable authority by the Missouri Public Service Commission (Commission) or as validated through the Commission's approved REC tracking system or a generator's attestation and further defined in 4 CSR 240-20.100 Electric Utility Renewable Energy Standard Requirements.
2. SREC - Solar Renewable Energy Credit - A REC produced by a solar electric resource.
3. SREC Price - \$5.00 per SREC.
4. Retail Account Holder - The customer of record taking service from Company under any of Company's retail electric tariffs.

## RIDER 8D

### SOLAR RENEWABLE ENERGY CREDIT PURCHASE (Cont'd.)

#### DEFINITIONS (Cont'd.)

5. Customer-Generator - the owner, lessee, or operator of an electric energy generation unit that meets all of the following criteria:
  - a. Is powered by a renewable energy resource.
  - b. Is located on premises that are owned, operated, leased or otherwise controlled by the party as Retail Account Holder and which corresponds to the service address for the retail account.
  - c. Has received approval from Company to interconnect with and operate in parallel phase and synchronization with Company's electric distribution system.
  - d. Meets all applicable safety, performance, interconnection, and reliability standards endorsed by the net metering rule, 4 CSR 240-20.065(1)(C)6 and 4 CSR 240-20.065(1)(C)7.
6. PVWatts - A program available from the U.S. Department of Energy (DOE) that estimates the kilowatt-hour (kWh) production of a solar electric system based on specific system parameters.
7. Incremental System Capacity - Any additional capacity installed by customer subsequent to Company having entered into a Net Metering Application/Agreement with Customer-Generator under Company's Electric Power Purchases from Qualified Net Metering Units tariff. Revising the capacity of a pending Net Metering Application/Agreement that has not yet become effective constitutes a design change for that pending Application/Agreement and will not be considered Incremental System Capacity.

#### STANDARD OFFERS

Company will purchase SRECs produced and owned by a Customer-Generator under either the Lump Sum Offer or the Annual Payment Offer listed below based on the DC nameplate capacity of the Customer-Generator's system. Only SRECs produced after January 1, 2013 are eligible for either Standard Offer. Payments will only be made to the Retail Account Holder.

- \* Lump Sum Offer applies to systems whose installed DC nameplate capacity is less than 10 kW and, at customer's option, any systems of 10 kW or larger but not greater than 100 kW that have not already executed an agreement under the Annual Payment Offer:

## RIDER SP

### SOLAR RENEWABLE ENERGY CREDIT PURCHASE (Cont'd.)

#### STANDARD OFFERS (Cont'd.)

- \*\* 1. Company will offer to purchase 100% of the SRECs produced during the first 120 calendar months (10 years) following the execution of the agreement or the operational date of the Customer-Generator whichever occurs later.
- \*\* 2. The numbers of SRECs produced annually will be determined by Company using PVWatts software with the result rounded to the tenths digit.
- 3. Company will make a single payment up-front for all SRECs purchased over the term of the agreement according to the following formula:

$$\text{Up-Front Payment} = \text{Annual SRECs produced} \times 10 \text{ years} \times \text{SREC Price.}$$

- \* Annual Payment Offer is available, at customer's option, to systems whose installed DC nameplate capacity is 10 kW or larger but not greater than 100 kW:
  - 1. Company will offer to purchase 100% of the SRECs produced during the first 120 calendar months (10 years) following the execution of the agreement or the operational date of the Customer-Generator whichever occurs later.
  - 2. Customer-Generator must make provisions for Company to meter all energy produced by the system. The numbers of SRECs produced annually will be determined by those meter readings with total SRECs available for purchase being kilowatt-hour energy divided by 1,000 with the result rounded to the tenths digit.
  - 3. Company will make payments annually no later than March 31 based upon actual SRECs produced as measured by meter readings from the 12 billing periods ending approximately December 31 of the immediately preceding year. This will result in eleven (11) payments over the ten (10) year term for most agreements with the first and last payment being for less than a full twelve (12) month period according to the following formula:

$$\text{Annual Payment} = \text{SRECs produced} \times \text{SREC Price}$$

#### INCREMENTAL SYSTEM CAPACITY

When a customer adds Incremental System Capacity, Company will make an offer to purchase the SRECs associated with only the Incremental System Capacity.

- 1. If the total capacity of the system remains eligible for the Lump Sum Offer, then Company will provide a Lump Sum Offer for the Incremental System Capacity.
- 2. If the Incremental System Capacity results in a total capacity that exceeds the capacity limit of the Lump Sum Offer, then the Annual Payment Offer will apply to the Incremental System Capacity. The number of SRECs purchased under the Annual Payment Offer will be the total number of SRECs produced by the system less any SRECs already purchased under the Lump Sum Offer during the same period.

### SOLAR RENEWABLE ENERGY CREDIT PURCHASE (Cont'd.)

#### \* OWNERSHIP CHANGE

If the Retail Account Holder associated with a Customer-Generator facility that has received payment under the Lump Sum Offer changes during the term of an agreement, the new Retail Account Holder will not be eligible for a contract until such time as the term of the existing Lump Sum Offer has expired.

If the Retail Account Holder associated with a Customer-Generator facility that has entered into an agreement under the Annual Payment Offer changes during the term of the agreement, the original Retail Account Holder will receive payment for all SRECs produced prior to the change and waives all rights to payment for SRECs produced after the change. Payments associated with SRECs produced subsequent to the change in the Retail Account Holder will be made to the new Retail Account Holder provided the new Retail Account Holder executes a new agreement for the balance of the five (5) year term.

#### CONTRACT/OFFER

Company will only accept a request for a standard offer contract if the Customer-Generator has submitted and Company has accepted a completed application for net metering service.

Company will provide a commitment to customer for either the Lump Sum Offer or the Annual Payment Offer provided that Company's cumulative total of the actual payment commitments and estimated payment commitments have not exceeded the amount(s) indicated under "AVAILABILITY".

For a Customer-Generator that is not yet operational (new systems), Company's commitment will be presented to customer upon acceptance by Company of Customer-Generator's design. For a Customer-Generator that is already operating under Company's Electric Power Purchases from Qualified Net Metering Units tariff herein, and has not previously received a Standard Offer from Company, Company's commitment will be presented to customer within ninety (90) days of January 1, 2013. Customers that previously received a Standard Offer from Company but did not accept the offer remain eligible to receive an offer, upon request and subject to availability, but will not be solicited again by Company.

Company's commitment will expire after twelve (12) months if any of the following conditions have not been met:

1. The Customer-Generator has not become operational or
2. the customer has not executed and returned the agreement or
3. Customer-Generator has not satisfied the metering requirements of the Annual Payment Offer.

## RIDER SR

### SOLAR RENEWABLE ENERGY CREDIT PURCHASE (Cont'd.)

#### CONTRACT/OFFER (Cont'd.)

- \* In the event Customer-Generator revises the nameplate capacity from that which Company's offer was based upon:
1. If the change is not more than a 10% increase or decrease in nameplate capacity, Company will present a revised SREC offer based on the revised nameplate capacity, or
  2. If the change is more than a 10% increase or decrease in nameplate capacity, Company's offer will become void. Availability and Term of this tariff will determine whether Company will present a revised offer.

Company will enter into an agreement and initiate the Lump Sum Offer or the Annual Payment Offer only after the Customer-Generator has become operational.

Any agreement executed between Company and customer under previous versions of this rider remain valid under the terms specified in that agreement.

In the event that Company ceases entering into new agreements as a result of meeting the cumulative total payment commitment referenced above and subsequently authorizes additional expenditures, Customer-Generators whose design was accepted by Company but did not receive an offer will be given the opportunity to participate under this rider in the order that their design was accepted by Company.

Inquiries related to this tariff, net metering service and Rider SR - Solar Rebate should be made to:

One Ameren Plaza  
1901 Chouteau Avenue  
P.O. Box 66149, MC 1450

Exhibit 7

**AFFIDAVIT OF COMPLIANCE WITH 2019 COMPLIANCE PLAN**

COMES NOW Ajay Arora, affiant, being of legal age, and upon being first duly sworn on his oath, states:

1. I am Vice President, Power Operations & Energy Management for Ameren Missouri. My business address is One Ameren Plaza, 1901 Chouteau Avenue, St. Louis, Missouri 63103.
2. As Vice President, Power Operations & Energy Management, I am responsible for ensuring Ameren Missouri's compliance with the Renewable Energy Standard (RES).
3. I certify that Ameren Missouri is in compliance with the RES compliance plan filed in April of 2019 for the calendar year 2018.
4. Under penalty of perjury, I declare that the foregoing is true and correct to the best of my knowledge and belief.

**Further, affiant sayeth not.**
