<sup>\*</sup> Customer's billing quantities shall be adjusted for applicable losses.

\*\* The MISO Ancillary Service Market for Reserve Services began in January 2009. Renewable Energy Compliance began in June 2010.

Supply Cost Adjustment is the "Adjustments to the Retail Supply Charges" as referenced in Rider HSS and Rider PER, determined in Docket No. 15-00305

<sup>\*\*\*</sup> Certain market settlement costs are not available in real-time, so this factor is not applied to the Customer's respective HSS usage until the Supply Balancing Adjustment (SBA) factor has been determined for the respective HSS load. The MISO performs several settlement steps causing a lag in the determination of the settlement costs. Once these settlement costs have been identified for the respective HSS load, the SBA will be determined and applied to that applicable HSS usage

<sup>\*\*\*\*\*</sup> Supply Cost Adjustment factor for Rider EUA. Charge assessed on billing cycle usage

<sup>\*\*\*\*\*\*</sup> DS-6 (Temperature Sensitive DS) is an optional rate for DS-3 and DS-4 Customers.
